DETAILED ACTION

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7, 9-11, 13 and 18-20 are rejected under 35 U.S.C. § 102(b) as being anticipated by Schoelling (US 2002/0151859 A1).

Regarding claim 13, Schoelling teaches a tampon (30) for feminine hygiene comprising an insertion end (32), a withdrawal end (34), a length, a longitudinal axis (L), a radial axis, and an outer surface (22);

said tampon (30) being comprised of compressed fibrous material (38)(¶ 0037);

wherein a measured portion of said outer surface of said insertion end (32) comprises a first surface area (forward ½ of tampon) and a measured portion of said outer surface of said withdrawal end (34) comprises a second surface area (rearward ½ of tampon), said first surface area being different than said second surface area (domed forward end (52) is a different shape than concave rear end (48)), wherein at least a portion of said first surface area comprises depressions (42) having a spiral shape, wherein at least a portion of the first surface area further comprises protuberances (40)(see figures 2 and 6, *infra*).

Regarding claims 5 and 6, Schoelling teaches a diagonal pattern of evenly spaced surface depressions (42)(figure 2).

Regarding claim 7, Schoelling teaches evenly spaced depressions (42)(figure 2).

Art Unit: 3761

Regarding claims 9-11, Schoelling teaches protuberances (40) arranged in an evenly spaced diagonal line pattern (figures 6-8).

Regarding claim 18, Schoelling teaches a tampon core with an essentially uniform density across its cross section.

Regarding claim 19, Schoelling teaches that the entire tampon core (38) is highly compressed (¶ 0037).

Regarding claim 20, Schoelling teaches a finger indent (48) at the withdrawal end (34)(¶ 0040).

Response to Arguments

Applicant's arguments with respect to claims 5-7, 9-11, 13 and 18-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3761

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
